**RE: Fiber Mesh RFI Letter – All Plans
Eagle Cove(PFS Consulting Job #21006)**

To whom it may concern:

This letter is to verify that for the above project, the following issue has been addressed by this office.

- It is acceptable to use Fibermesh 300 in the conventional concrete slab in place of the #3 rebars at 24" O.C. specified on the plans in keynotes 1 and 1A. The substitution amount shall be 2 lbs of Fibermesh 300 per cubic yard.

Please contact this office for any further questions regarding this matter.

This signature has been
applied electronically.

Patrick Modesitt, P.E.
